

Roulette is a simple game in which players predict where a marble will land on the roulette wheel by placing their bets on various numbers/combinations of numbers.

## Terminology

Inside bet: A bet placed on the inside of the table, or on specific numbers.

Outside bet: a bet placed on the outside of the table, encompassing large groups of numbers.

## Playing The Game

1. The dealer will open the table to bets. Each player can place a bet anywhere on the table.
  - Each player will be given a specific marker used to mark their bets on the table.
2. The dealer will close the betting by declaring "no more bets" and spin the marble.
  - Any bets placed at this point will be forfeit.
3. Once the marble stops, the dealer will pay out the winners (based on the odds) and clean the table to open it for betting once more by declaring "place your bets".
  - Players cannot place bets until after the table is clean. Anything placed before the dealer opens the table will be forfeit.
